ANDERSON OIL EXPELLER®

The new line of Anderson Expellers® are designed to continue Anderson's long standing tradition of providing the industry with the most durable and efficient presses on the market in a more maintenance and operator friendly package. The new press includes:

- Integral press maintenance hoist
- Feed and discharge shaft support for maximum wear life of wetted parts
- Hydraulically adjustable choke for better control
- Fully reversible gear box for clearing out a plug without machine dis-assembly
- Proprietary dual cast, hard faced worm design
- Anderson patented Diamonbars® for most efficient oil recovery
