

PREMIUM QUALITY OIL

Anderson International Corp

Expeller® Presses for Specialty Seed Oil Production

Natural Processing

Today's demand for nutritional oils requires natural processing steps. That is why the simple & safe mechanical approach is the choice for those concerned about high temperatures or chemicals altering natural characteristics of extracted oil.

Trusted Experience Since 1902

The Expeller® Press is designed by Anderson International to continuously & efficiently remove the oil. Experience is the key ingredient when choosing the right mechanical system for producing a Premium Oil. Anderson International Corp has been producing Expeller® Presses for the mechanical recovery of oils from a variety of seeds, beans and nuts since 1902.

Complete Process Systems

The Anderson Team is ready to help you get the most oil out of your specialty seeds, from seed cleaning through filtration. Talk to our knowledgeable staff today to discuss your total processing needs.
